¹ These are appropriated amounts. Actual spending is reduced mostly by a mandated transfer of 2.65% of extramural R&D funds for SBIR/STTR. Some funding levels are adjusted to reflect current organization and categories.

² FY 2007 appropriations were in a continuing resolution that based funding on FY06 levels, but added \$300 million for the DOE Energy Efficiency and Renewable Energy Office. The agencies issued Operating Plans for how they are allocating the funds.

³ The FY 2008 Senate bill includes increases that are not allocated at the individual program level. A total of \$32 million is provided for building codes, DOE Energy Star, and Rebuild America.

⁴ Includes \$15 million for the commercial zero-energy building initiative.
