

# The Road Ahead - MOU

**MISSION** Through collaboration and information exchange, our organizations agree to help develop and advance a pathway toward the combined use of onsite renewable energy generation and energy efficiency technologies and appliances resulting in market ready NZEHs.

## PURPOSE AND SCOPE

Advance the benefits of the more efficient use of zero or very low impact resources, cleaner air, climate protection and, economic development

Develop partnerships with private and public organizations with expertise or current activity in the management and delivery of residential construction and programs relevant to sustainable home design and construction

Build capacity across the relevant sectors and stakeholder groups

Market transformation of the sector and its role in a cleaner energy mix supply

Development of community scale demonstrations and market based tools to support
