Radio PSAs Script #2 GAS

We're all looking for ways to get more mileage from a gallon of gas.

I'm Energy Secretary Sam Bodman with steps you can take to save money by getting the most out of every gallon of gas you buy.

First, keeping your car tuned and in proper working condition can improve gas mileage by up to 40 percent.

Replacing your air filter and keeping tires properly inflated improves fuel efficiency.

Also, avoid idling your car. Running your engine when you aren't moving wastes gas and money.

Obey the speed limit - speeding reduces fuel mileage by up to 23 percent. Your gas mileage decreases rapidly once you get above 60 miles per hour.

You have the power to make a difference. By taking these steps, you can save money and help our nation reduce its energy use.
